Smilemakers – A Dental Service That Can Really Make You Smile

Great news for South Dublin residents: Smilemakers, Ltd. – provider of superior quality dentistry – has opened a new boutique surgery in Ranelagh, equipped with state-of-the-art facilities.

Our smile is one of our greatest assets – a nice smile indicates health, inspires confidence and promotes positive thinking. Very few people have naturally perfect teeth, but today's advances in dental science and technology mean that a great smile does not have to be a privilege enjoyed by only a few lucky ones. Smilemakers can help you achieve your dream smile, whether it is a major makeover or just some minor improvements, using the latest smile-design principles.

A great smile is natural

Smilemakers works with dental laboratories that use the latest materials and technologies, such as metal-free options, resulting in teeth that look perfectly natural and treatments that are also kind to the body.

A great smile could be yours

Smilemakers believes that there is an aesthetic and long-lasting solution for most dental problems. Its expertise in veneers, crowns and bridges means that patients can throw away their dentures, stop hiding their smile and eat well without thinking about it. Smilemakers' orthodontic specialist uses quick, efficient and modern techniques to straighten teeth and correct the bite without the need for any invasive treatment.

You are in good hands

Smilemakers' philosophy is simple: everybody deserves good, healthy teeth, service should be based on partnership between dentist and patient and there should be a range of treatment options to choose from. Smilemakers believes that a visit to the dentist should be a pleasant experience that is more about maintenance than firefighting! The company believes in tooth preservation and has a lot of experience in root canal treatments. Even the most demanding treatments should be pain-free.

Making it easy

Often, simple treatments can go a long way. For

example, discolouration can be got rid of by cleaning – descaling, polishing and in-office whitening treatment. Whiter teeth can take years off your appearance and they radiate health and well-being. The Zoom Advance whitening method used by Smilemakers is the most effective one available today, and – as it's performed by a qualified dental hygienist – it's very safe as well.

Strong links to Access Smile – Ireland's leading dental-tourism provider

Access Smile is one of Ireland's top dental-tourism companies, with a big, modern surgery in dentistry's European capital, Budapest. Smilemakers provides diagnostic, pre-consultation and aftercare services to Access Smile's customers to ensure that they have a strong Dublin base to call upon, linked to Access Smile's outstanding guarantee provisions.

Invest in your smile – you wear it every day

Smilemakers will help you invest wisely – returns are always guaranteed. That healthy, confident smile could be the key to keeping your job or finding a new one, and can have a great positive impact on your personal life, too.

Your smilemakers at Smilemakers

Dr Erika Barta moved to Dublin from the UK. Her main interest is cosmetic dentistry, she loves designing and creating great smiles for her patients. She is also very experienced in doing root canal treatments and has saved many teeth this way. Melinda Acs-Kocsis joined Dr Barta in the surgery as a dental hygienist and assistant. She has great experience in descaling and polishing as well as tooth whitening.
